May 1st, 2023

The Quebec Military Tribunal is issuing the following accusations against Ernest Prigent, the living human being who owns the legal person ERNEST PREGENT, in relation to the informations and evidences compiled below.

Considering the gravity of the accusations pending against you, you have the obligation to read the documents and listen to the videos on these pages:

- The accusations against the Prime Minister of Quebec Mr. François Legault: www.militarytribunal.quebec/en/affidavits/Affidavit1-Accusations-Francois-Legault-march2023-PDF.pdf

- Hearings of the Quebec Military and popular Tribunal against Pfizer, Moderna and the accomplices of Genocide and Crimes against Humanity on June 2-4 2023

<https://www.militarytribunal.quebec/Hearings-Quebec-Military-and-Popular-Tribunal-against-Pfizer-Moderna-and-accomplices-Genocide-June-2-4-2023-PDF.pdf>

Considering that you worked for Merck in 2000 at the time of the Thimerosal debate in the HepB vaccine for children and the connection to a rise in the cases of Autism, which has been rejected by mainstream medical authorities for over 25 years:

November 8, 2000

- A shot in the dark? Preservative in vaccines focus of health debate

“ Dr. Ernest Prégent, medical director of Merck Frosst Canada in Kirkland, Quebec, confirmed the Hepatitis B vaccine with the brand name Recombivax HB contains 50 micrograms of Thimerosal per one milliliter dose. ”

“ This means that an infant who weighs four kilograms receives more than 30 times the safe exposure level determined by the EPA and later confirmed by the National Academy of Sciences. ”

Considering that you have been the Director of the Hyperbaric Oxygen Chamber at Sacré-Coeur Hospital in Montreal, and that you were also working at the Syndic of the Quebec College of Physicians when you went on Paul Arcand radio show against Dr. Pierre Marois about the use of Hyperbaric therapy for children affected by Cerebral Palsy and Autism, where you claim that HBOT doesn't work for Autism', which is a huge lie:

December 2, 2010

- The Hyperbaric treatment for children affected by Cerebral Palsy – Dr. Pierre Marois, physiatrist at Ste-Justine Hospital and Dr. Ernest Prégent, urgentologist at Sacré-Coeur Hospital, hyperbaric Doctor

October 27, 2011

- Disturbing links of Dr. Ernest Prégent from the College of Physicians of Quebec with Merck... opposed to Hyperbaric Therapy for sick children
http://www.therapiehyperbare.com/fr/dossiers/2011-10-27_liens_dr_ernest_pregent_merck_autisme.html

Considering that, you have been a central figure in the whole COVID-19 terrorist psychological attack on the population of Quebec by going along with the 'Party Line,' saying nothing against the official narrative, and by endorsing medical advices to the population which are detrimental for their physical, mental, psychological and spiritual health and happiness. You have participated in the spreading of false science that has no basis in reality in order to scare the population to accept the unacceptable, and lead them to just comply and obey the new sanitary measures imposed by the World health Organization (WHO) and the U.S. Centers for Disease Control (CDC);

Considering that, as a Public figure, you cannot claim the ignorance of the dangers of vaccination nor of the 5G antennas in the face of the abundance of medical, scientific and legal references regarding these two topics:

Considering that, the un-necessary medical or scientific experiments for the medical treatment of a person contravene to Article 32 of the Geneva convention. The government has allowed the launching of a medical experiment on the population without allowing a free and informed consent. 10 articles from the Nuremberg Code of 1947, have been violated. The Nuremberg Code of 1947 identifies informed consent as an absolute prerequisite to the conduct of research involving human subjects:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results justify the performance of the experiment.

4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.

7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability or death.

8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

For all these reasons, the members of the Mega-Jury of the Quebec Military and Popular Tribunal are accusing you Mr. Prigent, of High Treason in regards to our nation and of complicity of Crimes against Humanity.

By virtue of the powers conferred on us, and as consequence and without limitations to the above, the Quebec Military Tribunal will issue an Arrest Warrant against you for your appearance to allow you to present your defense.

In witness whereof we sign,

Daniel Gaumont, Counter-terrorism Director, medical Fraud Investigator
